#### **DETAILED ACTION**

### **Priority**

Page 2

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

# Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claim 9 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by Cohen et al (2002.0019715 or 6,622,099) or Krah et al (2002/0022903).

Art Unit: 2837

Cohen et al and Krah et al show in figure 1 an AUTO-TUNE CONTROLLER implementing tuning that a servo control device (20,30,40) for driving a servo motor MOTOR 50 is run, a COMMAND GENERATOR 10 generating a command by an external operation of an operator and a sequence of tuning build in the device, and the AUTO-TUNE CONTROLLER adjusting the gain by the obtained information upon running. See figure 2 for the AUTO-TUNE CONTROLLER 100 comprising a USER INTERFACE 110, and the GAIN CONTROLLER 190 for controlling the gain of the motor control system.

## Allowable Subject Matter

4. Claims 1-8 are allowed. The references of the record fail to teach or suggest the gain adjusting method as recited in claims 1, 3, and 6.

## Response to Amendment

5. Applicant's arguments with respect to claims 1-9 have been considered but are most in view of the new ground(s) of rejection.

#### Citation of Pertinent References

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on form 892 disclose gain adjusting devices for motor control systems.

#### Communication Information

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul Ip whose telephone number is (571)-272-1941.

The examiner can normally be reached on Monday to Friday from 6:30 am to 3:00 pm.

Art Unit: 2837

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lincoln Donovan, can be reached on(571)-272-1988. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

8. Internet correspondence **MUST** be provided with a prior written authorization by applicant in the application file record giving the Office authorization to communicate with applicant vie e-mail. Without a written authorization by applicant in place, the USPTO will not respond via Internet e-mail to any Internet correspondence which contains information subject to the confidentially requirement as set forth in 35 U.S.C. 122.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
